Midland Remanufactured Products – Elevating Industry Standards For Remanufactured Products

ISO 9001-2000 : ISO 14001-2004 Registered

Haldex Brake Systems' dedication to advanced technology and total customer satisfaction, combined with the expertise and experience in remanufacturing products, provides you with the highest level of quality and integrity in remanufactured products. We set demanding specifications—and then

Haldex provides consistent processes along with state-of-the-art testing at each assembly station.

use precise machining, manufacturing and assembly practices to meet those guidelines. Once the products are in your hands and on your vehicle, we provide superior warranties, training and support that makes the perfect combination of performance and value.

The difference between remanufactured – and rebuilt.

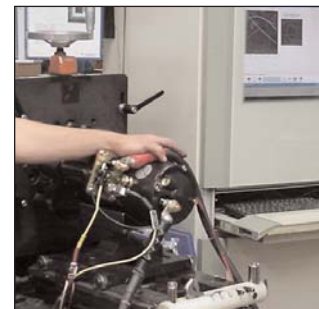

A rebuilder repairs products to operating condition. Haldex remanufacturing is not a rebuild process – each component is remanufactured to like-new condition which meets or exceeds OEM specifications.

The process begins by completely tearing down each unit, then inspecting all individual components. Haldex's standard manufacturing processes and procedures dictate the parameters of which components are remachined and which are replaced. Our comprehensive process is the key to maintaining the highest industry standards for quality and reliability.

Assuring the quality of each component and every finished assembly.

The Haldex remanufacturing facility is ISO 9001-2000 : ISO 14001-2004 Registered. Each procedure in every process is documented for consistency.

Remanufacturing processes and procedures are continually updated to meet industry advancements and changes in component

Precision remanufacturing state-of-the-art testing ensures superior performance and long life.

design. This continual upgrading of systems ensures that every remanufactured product is in compliance with the most current OE product specifications.

The result: reliability and security.

Midland remanufactured products are the result of superior components, precise processes, exacting quality standards – and most importantly, the skill, experience and pride of our committed workforce. As a result, our products continue to set the industry standard for reliability.

Each component is remanufactured to meet original specifications in terms of both design and performance.

These quality standards are reflected in our superior warranty coverage. Simple and straightforward, it's the best program in the business.

More complete support.

To back up our best-in-class products, we provide best-in-class customer service. It includes superior sales representation, troubleshooting assistance, training programs and web-based support. We also offer the Haldex Master Cross Reference, the most up-to-date parts cross-reference list in the heavy-duty industry. To top it all off, we have an on-time shipping record of over 98% to thousands of warehouse distributors and other locations throughout the World.

With an average of 18 years manufacturing experience, our skilled team is committed to best-in-class workmanship and quality.

The broadest HD reman line - and a lot more.

With remanufactured products from nearly forty different manufacturers, Haldex provides the most extensive line of any single remanufacturer.

Individual testing assures that you get products that are built to perform.

The parts you need. The performance you expect. The support and assurance you deserve. Midland Remanufactured Products provide it all - to give you the perfect combination of performance and value.
